

## Toolkit for deminers/EOD-operators

### Description

This is a complete set with all the equipment that a deminer needs in his/her daily work and contains instruments for localization, prodding, vegetation removal, excavation and marking of cleared areas. The equipment is packed in a functional carrying system so that it can easily be carried to the clearing site. This kit is intended to contain all the necessary basic equipment that a deminer needs - everything is included. In this way, a large number of deminers can be easily equipped and start the clearance work.
